HackINFINITY Workshop

(A two day workshop on Ethical Hacking & Information Security)

About Us

Since the beginning we have always followed the philosophy of the 3 "joys":
"The joy of learning"
"The joy of knowledge"
"The joy of teaching".... in the very same order.

How it all started:
We started out as a bunch of graduates from a couple of engineering colleges looking to work in the field of education owing it to either our backgrounds or interests. We were aware of the cut-throat competition in this field but we knew we had something different to offer to the students because we were one of them a few months back. We were a team of 5 boys working in the companies we were placed from the DCE campus and at the same time working on our weekends towards our hobby that was teaching. Hence we saw ourselves growing beyond our imagination and reaching out effectively to the various colleges/universities of the country.

What we do:
As the name "GO FOR TECH" suggests we are a **technology driven** company which provides educational services to a **vast client base** that includes students and professionals. We offer comprehensive engineering services in the areas of IT Security and Ethical Hacking, Embedded Robotics, Automotive Mechanics & IC Engines. We extend our educational services by conducting technical workshops and industrial training in various engineering colleges and schools to inculcate the spirit of technological advancement in the engineering youth of India.
Due to the lack of quality education as well as commercialization of education sector in India, we have designed our training courses to **very high standards** & keeping in mind the requirement of the industry. Our cost effective, flexible and value based delivery of courses makes our services prominent in academia and industry. Our association with various Student Collegiate Clubs, Non Profit Organizations and our Educational Partners provide us an access to reach students in every part of the country.

Our vision

     Go 4 Tech aims to give India's most reputed workshop in the field of ethical hacking and Information security. It aims to train participants and produce skilled ethical hacker and equips them with all the tools, techniques and methods needed to fight cyber crimes on the Internet. The promoters of Go 4 Tech had trained many students across India. These Workshops are intended to produce cyber army for the next generation. The live interactive sessions, practical lab sessions and real life examples will take participants inside the minds of an ethical hacker and teach them how to fight the cyber criminals on the Internet.

Why Ethical Hacking and Information Security?

- Huge Demand of IT Security Professionals – As per NASSCOM, India will require 2,00,000 IT Security Professionals by 2009 end. India currently has only 22,000.
- Recession Proof Industry – Even with the economic meltdown, the IT Security industry is supposed to have 30% compounded annual growth over the next 5 years because of ever increasing cyber crimes and exponential growth of Broadband Internet.

Process Guidelines

- We want your association with us to make this workshop big success in your college.
- A proper publicity will be done about the event at the All India Level
